About us

Metropolis is an independent company founded in 2005. At the moment the company's staff numbers about 200 highly qualified specialists allowing us to implement individual creative approach in each our project.

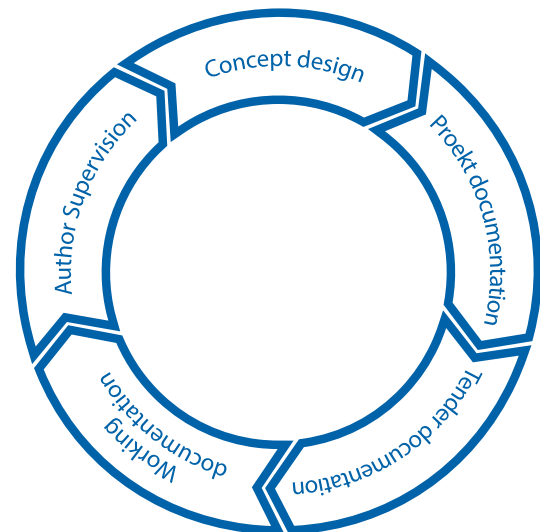

In our projects we successfully apply our strategic thinking, creativity and innovative design methods.

We offer Structural and Engineering design services for such projects as:

- 01 Mixed-use complexes
- 02 Residential complexes and hotels
- 03 Office complexes
- 04 High-rise and unique buildings
- 05 Shopping malls
- 06 Stadiums, water parks and ocean parks

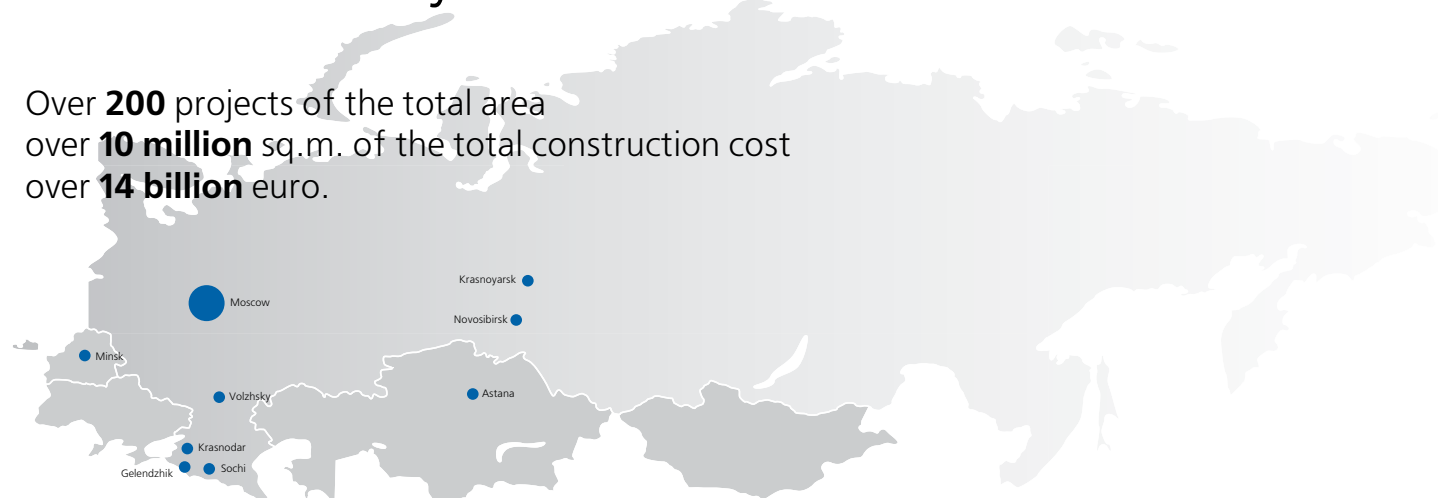

Design stages

More than 10 years at the market

Over **200** projects of the total area over **10 million** sq.m. of the total construction cost over **14 billion** euro.

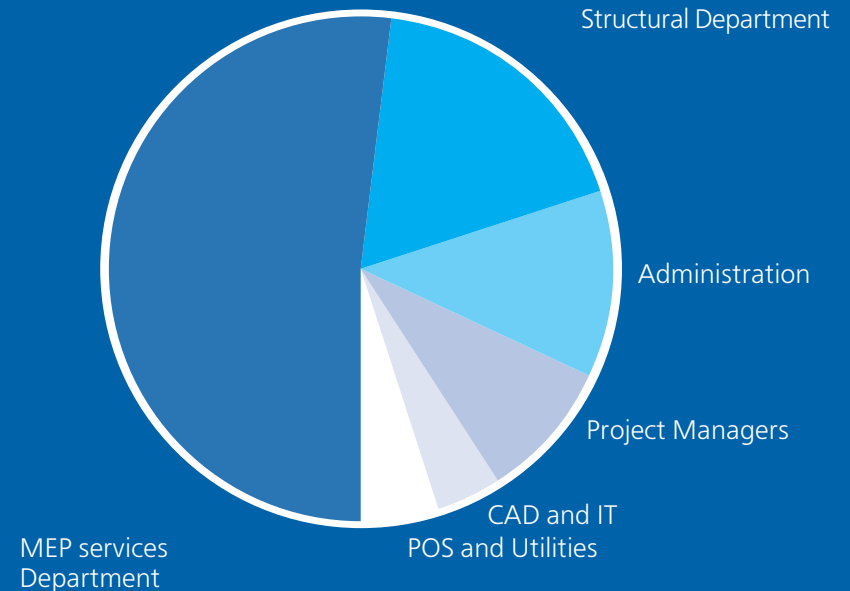

We speak **Russian, English, German, French and Arabic languages.**

Fields of expertise

- **Structural solutions**
- **MEP solutions**
- **On-site utilities**
- **Construction Management Plans**
- **Work production plans**
- **Civil Engineering**
- **Special design chapters**

Personnel distribution chart

Our services

- Development of design documentation at all project stages
- Technical audit and consulting services
- Author supervision and monitoring of construction works
- General Designer's services

Our goal is to provide high quality services at all project stages through application of our knowledge and experience gained during cooperation with the biggest Russian and international companies.

Metropolis is a member of the international organization Council on Tall Buildings and Urban Habitat, which allows us to be aware of the latest achievements in design and construction of high-rise buildings.

Metropolis is also a member of the Green Building Council, which allows us to develop designs in compliance with green standards BREEAM and LEED.

In our projects we strive for realization of the most ambitious ideas of our Clients built upon principles of reliability of design solutions, energy efficiency and quality.

Mixed-use complexes

'A' class office development consists of a low-rise part with a two-level underground car park and four blocks of office use. Area: 102,177 sq.m.

Stage: Project Documentation, Tender Documentation
Разделы: Structural solutions , Engineering solutions

Mixed-use complex Silver City, Moscow

Mixed-use complexes

'A+' class business centre with a 2-level underground car parking, a cafeteria, sales area and office premises. Area: 56,000 sq.m.

Stage:
Scope:

Working documentation
Engineering solutions

Mixed-use complexes

Mixed-use office complex Beregovoy, Moscow

Mixed-use office complex with underground parking and sales areas on the lower floors. Area: 378,000 sq.m.

Stage:
Scope:

Concept Design, Project Documentation
Structural solutions, Engineering solutions
